

Electrical Part for Forklifts

Forklift Electrical Parts - Forklifts could be purposely marked for use in hazardous places. A labeled truck indicates the design has met the minimum standards of ANSI/UL 558 for engine powered trucks or ANSI/UL 583 meant for electric trucks for the type of label attached.

The application for labels meant for lift forklifts can be found in National Fire Protection Association NFPA 505 - Powered Industrial trucks including: Maintenance and Operation, Type Designations, and Areas of Use. Ask your local insurance carrier and Fire Marshall for more information regarding the permitted uses of industrial powered forklifts in your application.

If the certain lift truck meets the outlined criteria, labels can be put. A labeled forklift will show the type of designation put on the nameplate and would have a correctly corresponding label put.
